What is Multi-I ?

Multi-I, this USB adapter eliminate the need for physical graphic cards and enables users to connect one or more monitors to a computer with a USB 2.0 port.

For not only desktop users but also laptop users adding extra monitors through USB connection is easier than opening the computer chassis to install a graphics card.

By reducing the connection process to a simple USB cable, Multi-I provides a unique solution to instantly clone or extend a desktop onto another display.

Users of both desktop and laptop computers need either multiple or larger displays to increase their productivity. With this Multi-I, they can add one or more displays to their laptop or desktop PC in just minutes.

Special Features

Easy USB connection

Plug & Play

Hot-plug: add or remove monitor without system reboot

Completely silent operation

Supported Modes: Mirrored Desktop, Extended Desktop

**Connect multiple monitors directly through your available USB ports
up to 6 Monitors**

USB hub 2 port (only for Multi-I 2 Channel)

Multi-I 1 Channel

Multi-I 2 Channel
